FRANCE

'I wouldn't have got any of my jobs without my PhD in Quantitative Marine Science.'

- Dr Sophie Bestley

PhD's that take you places

For Dr Sophie Bestley, a PhD in Quantitative Marine Science (QMS) on the migrations and feeding patterns of Southern Bluefin Tuna has led to highly sought - after jobs in Canada and France.

Now working on elephant seals, albatross, penguins and krill – identifying 'hotspots' or areas of high ecological significance in the Southern Ocean and Antarctic marine environments – Dr Bestley's work could be used to select marine reserves locations.
