

# maths:

make your career count

## Guitar Maker David Poulter

“ I am over the moon that I got the job at Maton. Without a good understanding of maths, I would not be here right now!

Maths is critical in the construction and design of a guitar. One of the first steps is to fit the neck to the body at the correct angle and within 0.25 millimetres.

You have to have a firm grasp of maths to get that specific.
