# maths:

make your career count

**Meteorologist  
Claire Yeo**

“ I forecast the weather for the Emergency Services and produce warnings for critical fire weather days or severe thunderstorms. Maths is an integral part of study to understand the physics of the atmosphere.

If you want a career as a meteorologist, it is a minimum requirement to have tertiary maths.

Weather is ever changing which makes it interesting to watch. Forecasting extreme weather is challenging, so my job is never boring.

”
